The Workplace Network Has Changed Forever

How You Achieve an Anytime, Anywhere Network Matters

pomeroy™
workplace. optimized.

Today's Network must be available anywhere, anytime employees need to access their work, data and applications.

Simply put a great user experience is 100% dependent on how well our applications perform.

Bandwidth intensive applications are becoming the norm so how we deliver bandwidth, higher speeds and zero delay matters.

In fact, your ability to compete for new business and workforce talent depends on an end-to-end managed network solution.

Connectivity The key is delivering connectivity to people wherever they are – corporate or remote office, Working from Home or on the road.

Throughput Today it's all about having the 'biggest pipes' available to deliver the greatest bandwidth and fastest speeds.

Availability Users have no patience for downtime, so the network must provide the highest reliability possible.

Control Enhanced ability to manage connectivity means optimized applications and user experience.

Greater Efficiencies Lower-cost options are now available that provide the same or better reliability and throughput.

Hybrid IT

Delivering business agility based upon on-prem & public clouds

Integrated Services

- Design, deploy, manage & refresh
- Intelligent Automation
- Strategic Staffing

Network Project Services

Pomeroy brings its industry-leading capabilities to provide secure, reliable connectivity for any device, any time, anywhere.

INTELLIGENT LAN

- Enterprise class networks
- Highly redundant backbones
- Capacity optimization
- Intelligent edge
- ACI implementations
- SD-Access/DNA architectures
- Optical/DWDM implementations
- MDF/IDF design assessments
- Network management

UC/COLLABORATION

- Voice, video, collaboration & contact centers
- Collaboration tools – Jabber, WebEx Teams

MANAGED WAN

- SD-WAN
- Security, reliability & performance
- Single pane of glass management
- Monitoring & management

SECURE WIRELESS

- Wireless surveys & spectrum analysis
- Optimized deployments in complex environments
- Location tracking & analytics
- Secure design

ACCESS MANAGEMENT

- Secure access based on device, user, time of day & location
- Two factor authentication
- Token management

Managed Network Services

Pomeroy delivers a unique, fully integrated suite of network monitoring and management services for enterprise and distributed, multi-site environments.

- Global Service Delivery, 24x7x365 Virtual NOC
- Support for servers, storage, network, IP telephony, cloud, apps, databases, security
- Comprehensive toolset & web portal for real time visibility & automation
- Provides performance optimization & cost improvement
- Managed Broadband Aggregation of 250+ ISP partners in North America
- End-to-End management, consolidated billing, Business Class SLA's (99.99% uptime)
