

Find and Fill Security Gaps with a Free Security Assessment from Pomeroy and Cisco

Pomeroy

50+ years in business

75K supported locations

2M supported devices

100%
coverage in North America

24x7x365
continuous care

Cisco

Visibility into **550** billion
security events per day

Over **300** million customers
worldwide

100% of Fortune 100
companies trust Cisco security
solutions

Protecting Data Wherever It Lives

The cybersecurity landscape has undergone a dramatic transformation. Rapid expansion of the network Edge—driven by widespread cloud adoption and a mobile, remote-first workforce—has redefined where and how data is stored and accessed. Today, critical data resides not only in traditional data centers but also across co-location facilities and diverse cloud environments. As employees access corporate resources from virtually anywhere, organizations must implement robust, adaptive security strategies that protect devices, applications, and data beyond the confines of the traditional network.

Cyber threats are also becoming increasingly sophisticated, making attacks difficult to detect. To stay protected, organizations need to implement advanced security solutions and practices.

Pomeroy has partnered with Cisco to offer comprehensive security solutions for our clients.

Gain insights into your entire environment

The **free security assessment**, powered with industry-leading Cisco technology, evaluates your environment through four lenses:

- Network security
- Data center
- Cloud
- IoT

This assessment grades the security of these areas and provides a roadmap to remediate any gaps in the short and long term.

Areas we support

- Network Operations Center (NOC)
- Security Operations Center (SOC)
- Security patches
- Secure Access Service Edge (SASE)
- SD-WAN

Be proactive when protecting your enterprise network

In 2024, the average cost of a data breach was \$4.88M (10% higher than in 2023).¹ Yet, many organizations fail to prioritize security until after a breach. Plan ahead to protect one of your most valuable assets: your data.

Access the next generation of cybersecurity tools with expert support

Gain comprehensive access to Cisco's best-of-breed cybersecurity tools, designed to protect your organization from a wide range of threats. These tools include:

- Advanced threat protection
- Next-gen firewalls
- Device security
- Email and web security
- Cloud security
- Application security
- DDoS protection
- Security AI and Analytics
- SASE and SSE
- Endpoint protection
- XDR

Pomeroy's security improvements can be implemented incrementally through a componentized approach, which is particularly beneficial for organizations with budget constraints.

Enhance your organization's security posture without needing a complete system overhaul. Our approach focuses on identifying and addressing vulnerabilities within your existing infrastructure, allowing you to augment current security components and improve your overall defenses.

Zero trust

Network segmentation

Continuous monitoring

Leverage Pomeroy's security expertise and long-standing partnership with industry leader Cisco to identify and address security vulnerabilities. Contact us today to get started with your free assessment.
