BANZAI

The adaptive AI platform that brings together conversational and agentic intelligence to unify your enterprise and empower your teams to focus more on what matters most.

How do I fix...

I can't connect...

AI that fuels human ingenuity

Automatically solve enterprise service requests with human-level intelligence and zero-touch automation to create a unified experience across all business domains.

| HR | Legal | Finance | Customer Service | Facilities | IT |

Solutions-Centric

Looking to the future, BanzAI's solutions can help accelerate your growth:

Service Desk Reinvented

BanzAI diagnoses the root cause of employees' issues, executes the fix, validates the outcome, and closes the loop with the user.

Workplace Automation

BanzAI supports multiple interaction modes, orchestrates guided workflows, and proactively engages employees with notifications, all while continuously learning to improve efficiency, reduce costs, and enhance employee experience.

Security Resilience

BanzAI ingests thousands of security signals per second, correlates threats across your infrastructure, and executes response protocols instantly.

Optimized Cloud Operations

BanzAI monitors resource utilization across AWS, Azure, Google Cloud and your private infrastructure in real-time to predict capacity needs, scale resources, and hunt for optimization opportunities.

Predictive & Preventive Field Service

BanzAI analyzes telemetry from distributed operations to identify failure patterns before they occur.

Autopilot for Back-Office Operations

BanzAI handles high-volume, rules-based processes that consume enormous amounts of staff time across HR and Finance functions.

Measurable Results

Less than **5 min.**	Up to **80%**	Up to **70%**	Up to **55%**	Star Ratings **4.8 to 5.0** ★★★★★
Incident Resolution	Faster Ticket Resolution	Ticket Reduction	Operational Cost Savings	Increased User Experience

Smart services purpose-built for enterprise

Founded on a simple belief that workplace technology should amplify human potential, not hinder it. Every moment spent wrestling with systems is one lost to creativity, service, and progress.

Core Priorities

AI-First
Built from the ground up with artificial intelligence at the core.

Human-Centric
Optimized for natural interaction that feels intuitive and effortless for end users.

Integration-Native
Seamlessly connects with existing enterprise systems without requiring replacement or major changes.

Outcome-Focused
Designed to deliver measurable business impact, not just technical capabilities.

Security & Compliance Committed
Enterprise-grade security with role-based access controls, audit trails, encryption, and compliance.

From Question to Solution: **How BanzAI Works**

I can't connect to the VPN
I can't access my email
My printer is not working

You have a tech issue.

You input the issue into a channel like Slack.

BanzAI orchestrates and combs through enterprises across your organization to solve the issue.

HR   Finance   IT   Engineering   Sales & Marketing

It takes action to resolve the issue through these systems:

Remote Endpoints

Onsite Devices

Cloud

Enterprise Applications

You're happy it's solved!
